---

## OBJECTIVE

To obtain a Full Stack Developer role with an organization where my skill set, passion for problem solving and solutions-oriented mindset can bring great value, while also building great products.

---

## EDUCATION

**Humber College**, Toronto, Ontario
**Computer Studies - Web Development (Post Graduate)**
*2020-2021*

- Dean's List
- Relevant Coursework: HTML, CSS, JavaScript, Vue.js, React, PHP, Product Management, MySQL, REST APIs

**Georgian College**, Orillia, Ontario
**Bachelor of Criminology**
*2014-2018*

---

## PROFESSIONAL EXPERIENCE

**Lead Frontend Developer**
*Carelancer LP*
*December 2023 - Present*

- Leading the frontend development team in designing, developing, optimizing, and maintaining high-quality web applications using Vue.js 3 Composition API, Quasar Framework, Pinia Vuex State Management and relevant libraries.
- Connecting frontend with backend integration using REST APIs and server-side rendering mechanisms.
- Experience in connecting third party API's (stripe) and libraries into existing projects with ease.
- Not just developing, but this position involved product design and UX/UI development when building features. Experienced in proper UX/UI / mobile development and thought process. Mobile first development etc.

- Also experience in assisting with job interviews (both introduction and technical), onboarding new developers.

**Lead Full Stack Engineer**
*Modzee Software (Sister Company of Creative Guild)*
*Sept 2021 - December 2023*

- Led development and feature planning for a SaaS intranet platform with various add-on modules including marketplace, notes, calendar, notices, and more.
- Oversaw the performance and stability of the Vue.js, PHP, and MySQL application, ensuring uninterrupted service and optimal functionality.
- Developed and integrated third party services such as Giftbit, ChatGpt, and BigCommerce, into our product.
- Collaborated with high-profile clients like Osmows Canada to tailor solutions to their specific needs, demonstrating flexibility and customer-focused development.
- Managed deployment processes using AWS Beanstalk, ensuring high availability, scalability, and smooth transitions from development to production.

**Full Stack Engineer**
*Creative Guild*
*June 2021 - Sept 2022*

- Built, tested, and launched projects for a country-wide B2B learning/training portal (whirlpoolcentral.ca) and a live streaming web application (whirlpoolconnect.ca) used to broadcast live lectures and presentations to 500+ users at a time.
- Created custom features for these platforms using Vue.js + Vuex on the frontend and a Laravel PHP MVC approach on the backend, backed by a MySQL database which is being called by the frontend via Axios API calls.
- Actively participated in code reviews and provided constructive feedback to ensure that all code met established standards and best practices.
- Developed detailed developer documentation, including testing notes and Git documentation, covering branches and pull requests from development to production environments.

**Freelance Web Developer**
*2019 - Present*

- Designed and developed full-featured, functional websites using various software programs, including defining information architecture supported by navigation, layout, text, and graphics.
- Tested, troubleshooted, and debugged software to ensure smooth functionality.
- Developed data-driven websites for multiple platforms, adhering to best practices, industry standards in content management, security, database design, interface design, usability, accessibility, and personalization.

**Insurance Claims Agent**
*Intact Insurance*
*2018-2020*

- Guided clients through difficult and sensitive scenarios regarding their automobile and injuries sustained from automobile collisions.
- Recorded and consistently posted high marks on all metrics while managing a high volume of inbound calls with customer issues.

---

## SKILLS

- **Frontend Development:** JavaScript, Vue.js (Vue 3), React.js, HTML5, CSS, TailwindCSS
- **Backend Development:** PHP, Laravel, MySQL, Node.js
- **Integration:** REST APIs, Axios, JSON
- **Tools & Technologies:** Git, Docker, JIRA, CI/CD Pipelines, Linux/server administration
- **Other:** Problem-solving, debugging, Agile Scrum, unit testing
- **Specialization:** Proficient in JavaScript and Vue 3, with the ability to quickly adapt to any framework and learn new technologies swiftly.

---

## ADDITIONAL ASSETS

- Experience with Quasar framework
- Proficiency in Node.js development and associated framework.
- Proficiency in other front-end technologies such as Angular, React, etc.
- Experience in integrating third-party services and debugging
